Main: + Medicaid expansion control

Triple: type x pre−policy excess readmissions (per SD) x post

Triple: type x penalised in FY2013 x post

Triple: type x baseline case mix (per SD) x post

Triple: type x high case mix (above median) x post

HF discharge instructions (HF−1)

HF−1, hospitals below 98% at baseline

HF LVS function evaluated (HF−2)

HF ACE inhibitor / ARB (HF−3)

HF−1 minus HF−2 (within hospital)

HF−1 minus HF−3 (within hospital)

Care processes (Hospital Compare)

Case mix index (transfer−adjusted)

Case mix index, same−grouper chain

log Medicare cases (impact file)

Case mix (IPPS impact files)

Operating margin (winsorised)

log operating expenses

log patient revenue

log labour costs

log equipment purchases

Finances (HCRIS)

HF mortality

AMI mortality

Pneumonia mortality (to 2014)

Patient experience (HCAHPS)

HF readmission (to 2014)

HF readmission (to 2017)

Pneumonia readmission (to 2014)

AMI readmission

Readmissions by HRRP condition

log pneumonia readmission cohort

log HF readmission cohort

log pneumonia minus log HF cohort

Readmissions: cohort size (coding)

log FT physicians & dentists

log FT residents

Staffing (AHA)

log total discharges

Medicare share of discharges

Medicaid share of discharges

log admissions (AHA)

Length of stay (AHA)

log ED visits (AHA)

Volume and patient mix

−1.0 −0.5 0.0 0.5 1.0

Type 1 minus type 0, after vs before (SD of the pre−period outcome; post−period SD for programme payments; 95% CI)

Physician CEO (agreement) Clinical CEO (agreement) Physician executive (990) Physician CEO (combined, incl. for−profits) Clinical CEO (combined, incl. for−profits)

Entropy−balanced; hospital and year FE; controls for system change and Medicaid expansion; SEs clustered by hospital. CMO and clinical−share types: tables only.
